

# Are you looking to become a Trainee Civil/Structural Technician or Engineer?

We are recruiting and can offer:

- An Institution of Civil Engineers Accredited Training Scheme
- A sponsored training position
- A route from school to professional qualifications
- Being part of an award winning firm
- A young office environment motivated to support you in your development

Using Finite Element Analysis to design a cantilevered balcony

Established in 1981, we are one of Jersey's leading Civil and Structural Engineering Consultancy firms. Our scope of work includes commercial, leisure and residential buildings for a wide range of public, commercial and private clients.

We were voted Jersey Consultant of the Year 2015 at the Jersey Construction Council Awards on the basis of our long term commitment to training and developing staff including in the use of the latest technology to produce and develop designs and drawings.
